WARRANTY INFORMATION

Hard Water and Warranty

Hard water contains high levels of dissolved minerals, primarily calcium and magnesium.

Over time, limescale can build up, affecting the functionality and appearance of your taps and showers, which may impact your warranty coverage.

To help prevent damage to your products, please follow these steps:

- Clean your taps regularly with warm water and a soft cloth
- Avoid using harsh abrasive cleaners

The map below provides a guide to water hardness in various regions of the UK&I.

1 year warranty applicable to all serviceable parts. All warranties are subject to our terms and conditions.
