

WALL PANELS

WALL PANELLING

Two Steps To Create Your Waterproof Showerwall System:

1. Decor - Select your decor from one of our collections

Our new **WBP** (Weather and Boil Proof), **Laminated Plywood** and **PVC Panels** are manufactured with ProClick technology.

2. Panel Details - Square Cut or ProClick

Square Cut is a traditional panel and uses a Jointing Trim where two or more panels are required side by side.

ProClick technology has been engineered to create a mechanical locking system that provides seamless, almost invisible joints.

Installation is made easy through the click design which allows panels to be located quickly and easily into place, eliminating the use of joining trims.

3. Waterproof System - Trims and Sureseal

In order to ensure a watertight finish, trims are required for the outer edges of the panels as well as both internal and external corners.

Four trims are available dependant on where you would like to fit our panels. Note: all trims measure 2450mm in length and should be sealed using Showerwall sealant.

Internal Corner Trim

Used on all internal 90° corners.

External Corner Trim

Used on all external 90° corners.

Square and Quadrant End Trims

Finishing end trims for square cut edge panels.

Sureseal

At the base of the PVC or Plywood Showerwall panel, even greater sealing performance is achieved using Sureseal.

This seal ensures four points of cover; made up of an enclosed sealant line protected by a neat trim with both front and end capping.

Available to order in Black, White and Satin Silver.

We recommend Showerwall's own brand of adhesive is used for the effective fitting of the product.

Product	Code	Price
350ml Panel Adhesive	WAL020	£29.00
Sureseal	SS01*	£25.00
Sureseal End Caps	EC01*	£9.00
